

Scoring a match online

A guide for WDPL team captains

WELLINGTON & DISTRICT POOL LEAGUE

Before the night

You score your match on your phone, on the league website. There is nothing to install and nothing to set up — open the site in whatever browser you normally use.

You need two things: your team, and the PIN the league secretary gave you. The PIN is yours alone. If you have not got one, or it has stopped working, ask the secretary.

The screenshot shows a login interface with a dark blue background. At the top, it says "Your team". Below it is a dropdown menu with "Bell Hawks (Division One)" selected. A red circle with the number 1 points to this dropdown. Below the team selection is a "PIN" field with a masked input (dots). A red circle with the number 2 points to this field. At the bottom is a blue "Sign in" button. A red circle with the number 3 points to this button.

- 1 Pick your team from the list.
- 2 Type your PIN. Nobody else on the site can see your card.
- 3 Sign in. You stay signed in on that phone, so you only do this once.

Your match card

Once the secretary has opened the match, your card appears. This is the same card you would fill in on paper — the same fifteen frames, in the same order.

It saves itself the moment you tap. There is no Save button and nothing to submit.

The screenshot shows a match card interface. At the top, there are four tabs: "Scorecard", "My squad", "Fixtures", and "Contacts". A red circle with the number 3 points to the "Scorecard" tab. Below the tabs is a "PIN" field. A red circle with the number 1 points to the "Scorecard" tab. Below the PIN field, the score is displayed as "4-2" in a green box, with "6 of 15" below it. A red circle with the number 2 points to the score display. Below the score, there is a section for "Home 7/15 · Away 6/15 · Scored 6/15" and a "Phase 2 of 3" indicator. A red circle with the number 3 points to the "Scorecard" tab.

- 1 The score as it stands, and how many frames are done.
- 2 How many players each side has named so far.
- 3 Your squad, fixtures, other captains, and your PIN.

Naming who plays

Tap any empty slot on your side and pick the player from your squad. That is the whole job.

Your side only: the away captain names their own players, on their own phone. If a frame will not open, it is not your turn yet — see *Who picks first* below.

Choose who plays this frame:

Dave Marsh

Gary Wilkes

Ryan Foulkes

Sam Dowding

1 Lee Prentice

Curtis Mannion

2 VOID (frame conceded)

Clear this slot

Someone not on the list

3 Type a name

Adds them to the squad, so you can pick them in later frames too.

- 1 Your squad. Tap a name and the frame is filled in.
- 2 Use VOID when you are a player short and have to concede the frame.
- 3 Someone not on the list? Type their name here.

Someone who has just turned up

A player who is not on your squad yet — a new signing, or someone the league has not got on file — can be added on the night. Type their name and tap **Add and pick**.

They go onto your squad as well as into that frame, so you can pick them again in later frames without typing the name a second time. The secretary collects them into the league records afterwards.

Someone not on the list

1 Nathan Pryor

Adds them to the squad, so you can pick them in later frames too.

Add and pick

2 Cancel

- 1 Their full name, as the league should record it.
- 2 Adds them to your squad and puts them in this frame.

The draw

If your team draws names out of a bag rather than choosing an order, use the dice buttons. **+1** fills the next empty slot, **+5** fills up to five, **All** fills every empty slot on your side.

The draw obeys the same rules you do: nobody gets more than their allowed number of frames, and the same two players are never put together twice. If it cannot fill a slot legally it leaves it for you and says so.

The names appear in the frames straight away. Tap any of them to change your mind.

- 1 It tells you how many it managed to draw.
- 2 Tap for one, five, or the lot.

Recording a frame

When a frame finishes, tap the number next to the player who won. Tap it again if you get it wrong — nothing is fixed until both captains sign the card off.

If the frame was won on the black from a full clearance, tap the **8** on that row. The other captain sees it and can disagree, which is how the paper card worked too.

You cannot record a winner before both players are named. That is deliberate: a frame with a score and no players tells the league nothing and breaks the player averages.

- 1 Tap to mark the winner. Green is home, red is away.
- 2 Tap the 8 if the black was potted on a clearance.

Who picks first

The home captain names a player for a frame, then the away captain names theirs for that same frame. Until the home name is in, the away slot stays locked.

The last five frames work differently. The home captain has to name all five of their players before the away captain sees any of them — so neither side can tailor the closing frames to the other's line-up. This is the league rule, not a quirk of the website.

If a slot will not open, this is almost always why.

Match notes

Anything the league should know — a late start, a table problem, a player dispute — goes in the notes box at the bottom of the card. It saves as you type.

- 1 Seen by the secretary when the card is collected.

Signing off

When every frame has a result, both captains sign the card off. Yours is **Sign off my side**. Once you both have, the card is finished and the league collects it.

If you spot a mistake after signing, tell the secretary — they can reopen the card. Editing it afterwards clears both signatures, so you would both sign again.

- 1 Tells you what is still missing before you can sign.
- 2 Signs off your side only.
- 3 For when the other captain's phone cannot get online — see below.

Your squad

The **My squad** tab is the list you pick from. Add a player here before the night if you know they are coming, or retire someone who has stopped playing.

You can rename a player you added yourself. Players the league put on your squad are the league's to rename — ask the secretary.

- 1 Their full name.
- 2 Adds them to your squad.
- 3 Everyone available to pick on the card.

Fixtures and other captains

The **Fixtures** tab shows your season — who you are playing, where, and when. The **Contacts** tab has the other captains' phone numbers, for when you need to rearrange or you are running late.

1 Every other captain in the league, and their venue.

Changing your PIN

The **PIN** tab lets you set your own. You need your current PIN to change it.

Choose something you will remember: the league cannot read your PIN back to you, only replace it. If you forget it, the secretary will set you a new one.

1 Your current PIN, then the new one twice.

If the signal drops

Pubs are not famous for their phone signal. The card keeps working: your taps are held on your phone and sent the moment the signal comes back. A badge at the top tells you when something is waiting.

You do not need to do anything. Keep scoring, and do not close the page until the badge says everything has been sent.

The one thing that does need a connection is the draw, because the names are picked by the league's server rather than by your phone.

If one phone cannot get online at all

Sometimes one of you has no signal in that pub and is not going to get any. Rather than lose the card, the captain who *is* online enters both teams.

Tap **Enter both teams** and you can name the away players as well as your own. The usual picking order is set aside, because there is nobody to take turns with — you agree the line-ups between you as you would on paper.

Tap it again to hand the other side back as soon as their phone is working. If the card gets left that way at the end of the night, the secretary can hand it back for you.

Quick answers

The away slot will not open.

The home captain has not named their player for that frame yet. For the last five frames they have to name all five first.

I cannot tap a winner.

Both players have to be named first.

I picked the wrong player.

Tap the name again and choose the right one. Nothing is fixed until you both sign off.

Someone is playing who is not on my list.

Type their name in the picker and tap Add and pick.

We are a player short.

Choose VOID for that frame. It counts as conceded.

I signed off too early.

Tell the secretary. They can reopen the card, and you both sign again.

My PIN has stopped working.

The secretary may have reset it. Ask them for the new one.

I closed the page by accident.

Open it again and sign back in. Nothing is lost.
